

I-SEM Market Trial Detailed Run Sheet

Scenario 7 – Unscripted

Week 1 – ‘Down Week’

Version 1.0

Introduction and Purpose

This document sets out the activities to be performed by market participants for Scenario 7, Week 1 of the Market Trial. This week is focused on the market trial team planning for the transition from Scripted Market Trial to running the full 168 Hour operations process during Unscripted Market Trial.

Throughout the week we will be running Full Market Functions comprising coupled DAM, Coupled IDA1, Uncoupled IDA3, ICM and Balancing Market

In addition there will be a number of 'Transition' activities happening in the background which may result in the balancing market being unavailable at short notice due to the technical team performing a number of non-functional and performance tests – These will take place each day and where any disruption to the balancing market may occur this will be communicated on the daily calls.

The Run Sheets are specific to each day of the week commencing on Tuesday 20th March 2018 through to Friday 24th March 2018 and are formatted as follows:

Time:	This defines the time period during which the activity is due to take place. Where a specific time is shown this indicates the latest time for the activity
Participants:	This will detail the 'Actors' that should participate in the Activity, where this is not set to 'All' it will highlight the specific 'Actors' as defined in the Market Participant Guide Book
Activity:	This details the activity that the participants should perform during this time period
Inputs:	This details all of the inputs required for the defined activity
Outputs:	This details all outputs from the defined activity

Data Submissions to support Scenario 7

In order to provide successful outcomes for this and remaining scenarios the following principles should be followed:

1. Commercial Offer Data submitted to the Day Ahead market should be aligned as much as possible to the existing submissions to the Live SEM Market.
2. Trading in the Intra Day Market is encouraged and should be based on the results of the DAM.
3. Commercial Offer Data submitted to the Balancing market should be based on individual trading strategies and should include both Pricing and forecast availability.
4. Daily PN Submissions are required and must maintain a continuous curve.
5. Initial PN Submissions are **Mandatory** for all dispatchable generators and must be submitted for every trading day prior to the 13:30 deadline (These can be submitted in advance for future trading days, if required).
6. Initial PN Submissions will also be required for trading days where there is currently no scripted activity (e.g. Friday through Sunday) and therefore these should be submitted in advance if not able to submit on the day.

7. Failure to submit mandatory PN's will result in the balancing market being unable to produce a schedule and therefore will impact on market results for all participants.
8. Meter Data (D+1 & D+4) must be submitted daily in accordance with the run sheet by ALL Meter Data Providers and contain data for ALL units registered in Market Trial as this will be used within the Settlement processes

Market Trial – 7 Day Operations

Note: During Scenario 7 we will be running markets 7 days a week.

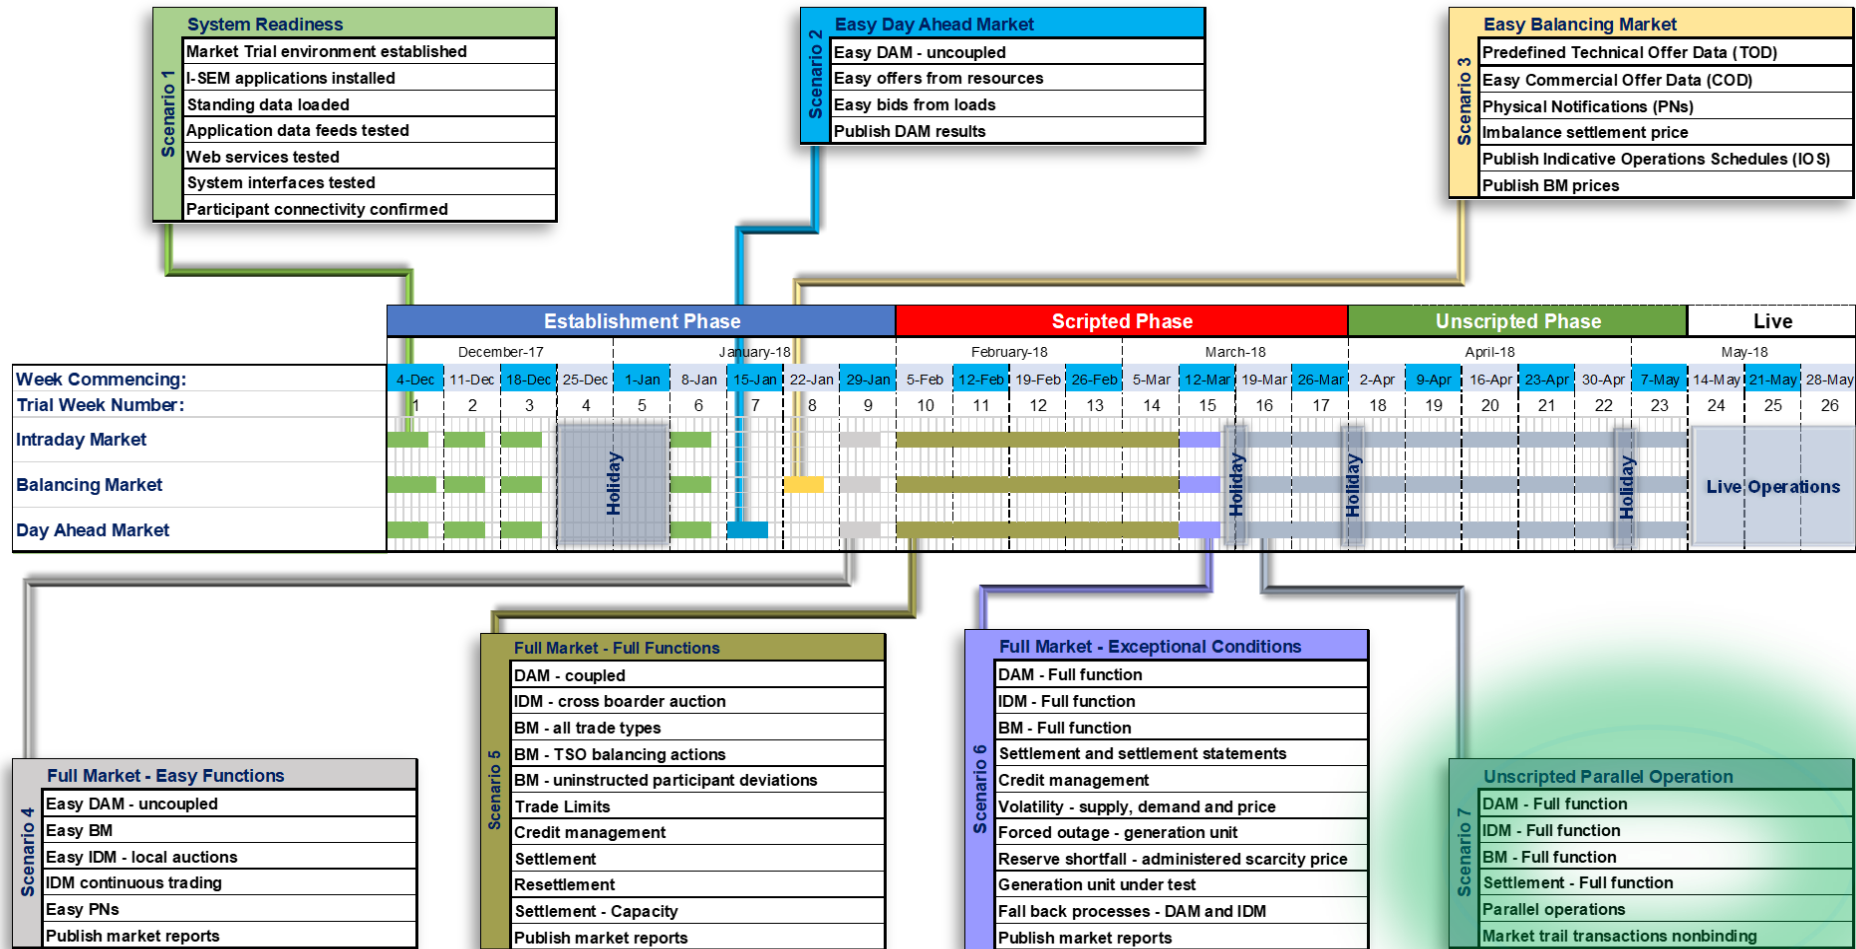

In order to facilitate this SEMOpx will run the DAM for Saturday and Sunday based on participant submissions. The Gate Closure for submissions into the Saturday and Sunday DAM will be at 16:00 on the Friday and therefore any submissions for delivery dates of Sunday and Monday must be entered prior to the order book closure on Friday.

The results of the Saturday and Sunday auctions will be available Friday evening and the nominations executed early the following Monday morning.

Participant Conformance Testing

Note: It is appreciated that a number of the participant organisations are currently planning their own conformance testing with SEMOpx and therefore to avoid any conflicts with the scripted DAM submissions we would request that any planned conformance testing uses the next available Sunday as the Trade Date for such tests.

Market Trial Timeline

The chart below provides a visual summary of the Trial timeline

Day 1 – Tuesday 20th March 2018 – Execution of Full Market

The planned activities for Tuesday 20th March are for all applicable participants to submit Commercial Offer Data into the Coupled Day Ahead Auction for the following trading day, the Balancing Market for the current and subsequent Trading Day for which the Day Ahead Auction has been completed and additionally into one of the Coupled Intraday Auctions (IDA1) as well as the Uncoupled Intraday Auction (IDA3). All Commercial Offer data into the DAM must be submitted ahead of the DAM order book closure whilst submissions to the BM can happen throughout the current trading day. **There will be Fail Over Testing today between Dublin and Belfast which may cause significant periods of unavailability of the balancing market. Any further Transitional activity relating to Non Functional or Performance Testing that may impact on the Balancing Market availability will be communicated on the morning call**
