

I-SEM Market Trial Detailed Run Sheet

Scenario 7 – Unscripted

Week 2 – Full Market Operations

Version 1.0

Introduction and Purpose

This document sets out the activities to be performed by market participants for Scenario 7, Week 2 of the Market Trial. This week is focused on running the market trial unscripted with full market functions (Coupled DAM, Coupled IDA1 and Uncoupled IDA3)

The Run Sheets are specific to each day of the week commencing on Monday 26th March 2018 through to Thursday 29th March 2018 and are formatted as follows:

Time:	This defines the time period during which the activity is due to take place. Where a specific time is shown this indicates the latest time for the activity
Participants:	This will detail the 'Actors' that should participate in the Activity, where this is not set to 'All' it will highlight the specific 'Actors' as defined in the Market Participant Guide Book
Activity:	This details the activity that the participants should perform during this time period
Inputs:	This details all of the inputs required for the defined activity
Outputs:	This details all outputs from the defined activity

At the end of this week we will be entering the Easter Holiday period during which all systems will be available but with limited support. Our vendors at SEMOpX will run the four DAM auctions for Friday through to Monday on the Thursday evening after 16:00 so participants will need to ensure that their commercial offer data has been submitted to ALL of the DAM auctions prior to 16:00 on Thursday 29th March.

Data Submissions to support Scenario 7

In order to provide successful outcomes for this and remaining scenarios the following principles should be followed:

1. Commercial Offer Data submitted to the Day Ahead market should be aligned as much as possible to the existing submissions to the Live SEM Market.
2. Trading in the Intra Day Market is encouraged and should be based on the results of the DAM.
3. Commercial Offer Data submitted to the Balancing market should be based on individual trading strategies and should include both Pricing and forecast availability.
4. Daily PN Submissions are required and must maintain a continuous curve.
5. Initial PN Submissions are **Mandatory** for all dispatchable generators and must be submitted for every trading day prior to the 13:30 deadline (These can be submitted in advance for future trading days, if required).
6. Initial PN Submissions will also be required for trading days where there is currently no scripted activity (e.g. Friday through Sunday) and therefore these should be submitted in advance if not able to submit on the day.
7. Failure to submit mandatory PN's will result in the balancing market being unable to produce a schedule and therefore will impact on market results for all participants.
8. Meter Data (D+1 & D+4) must be submitted daily in accordance with the run sheet by ALL Meter Data Providers and contain data for ALL units registered in Market Trial as this will be used within the Settlement processes

Market Trial – 7 Day Operations

Note: During Scenario 7 we will be running markets 7 days a week.

In order to facilitate this SEMOpx will run the DAM for Saturday and Sunday based on participant submissions. The Gate Closure for submissions into the Saturday and Sunday DAM will be at 16:00 on the Friday and therefore any submissions for delivery dates of Sunday and Monday must be entered prior to the order book closure on Friday.

The results of the Saturday and Sunday auctions will be available Friday evening and the nominations executed early the following Monday morning.

Participant Conformance Testing

Note: It is appreciated that a number of the participant organisations are currently planning their own conformance testing with SEMOpx and therefore to avoid any conflicts with the scripted DAM submissions we would request that any planned conformance testing uses the next available Sunday as the Trade Date for such tests.

Market Trial Timeline

The chart below provides a visual summary of the Trial timeline

Day 1 – Monday 26th March 2018 – Execution of Full Market
