

# I-SEM Market Trial Detailed Run Sheet

---

Scenario 7 – Unscripted

Week 20 – Full Market Operations

Version 1.0

## Introduction and Purpose

This document sets out the activities to be performed by market participants for Scenario 7, Week 20 of the Market Trial. This week is focused on running the market trial unscripted with full market functions (Coupled DAM, Coupled IDA1, Coupled IDA2 and Uncoupled IDA3).

SEMOpX will operate all Ex-Ante Auctions each day including Saturday 4th and Sunday 5th of August 2018. Participants can either submit commercial offer data in advance (as currently) or submit on the day should they wish to trial their own weekend procedures.

- Participants are advised that if they wish to trial the 'Unit Under Test' functionality then this will be available for the remainder of Scenario 7 utilising the guidelines published in the [Interim Procedure for Unit Testing in I-SEM](#) document

The Run Sheets are specific to each day of the week commencing on Monday 30th July 2018 through to Sunday 5th August 2018 and are formatted as follows:

<b>Time:</b>	This defines the time period during which the activity is due to take place. Where a specific time is shown this indicates the latest time for the activity
<b>Participants:</b>	This will detail the 'Actors' that should participate in the Activity, where this is not set to 'All' it will highlight the specific 'Actors' as defined in the Market Participant Guide Book
<b>Activity:</b>	This details the activity that the participants should perform during this time period
<b>Inputs:</b>	This details all of the inputs required for the defined activity
<b>Outputs:</b>	This details all outputs from the defined activity

## Data Submissions to support Scenario 7

In order to provide successful outcomes for this and remaining scenarios the following principles should be followed:

- Commercial Offer Data submitted to the Day Ahead market should be aligned as much as possible to the existing submissions to the Live SEM Market.
- Trading in the Intra Day Market is encouraged and should be based on the results of the DAM.
- Commercial Offer Data submitted to the Balancing market should be based on individual trading strategies and should include both Pricing and forecast availability.
- Daily PN Submissions are required and must maintain a continuous curve.
- Initial PN Submissions are Mandatory for all dispatchable generators and must be submitted for every trading day prior to the 13:30 deadline (These can be submitted in advance for future trading days, if required).
- Initial PN Submissions will also be required for trading days where there is currently no scripted activity (e.g. Friday through Sunday) and therefore these should be submitted in advance if not able to submit on the day.
- Failure to submit mandatory PN's will result in the balancing market being unable to produce a schedule and therefore will impact on market results for all participants.
- Meter Data (D+1 & D+4) must be submitted daily in accordance with the run sheet by ALL Meter Data Providers and contain data for ALL units registered in Market Trial as this will be used within the Settlement processes

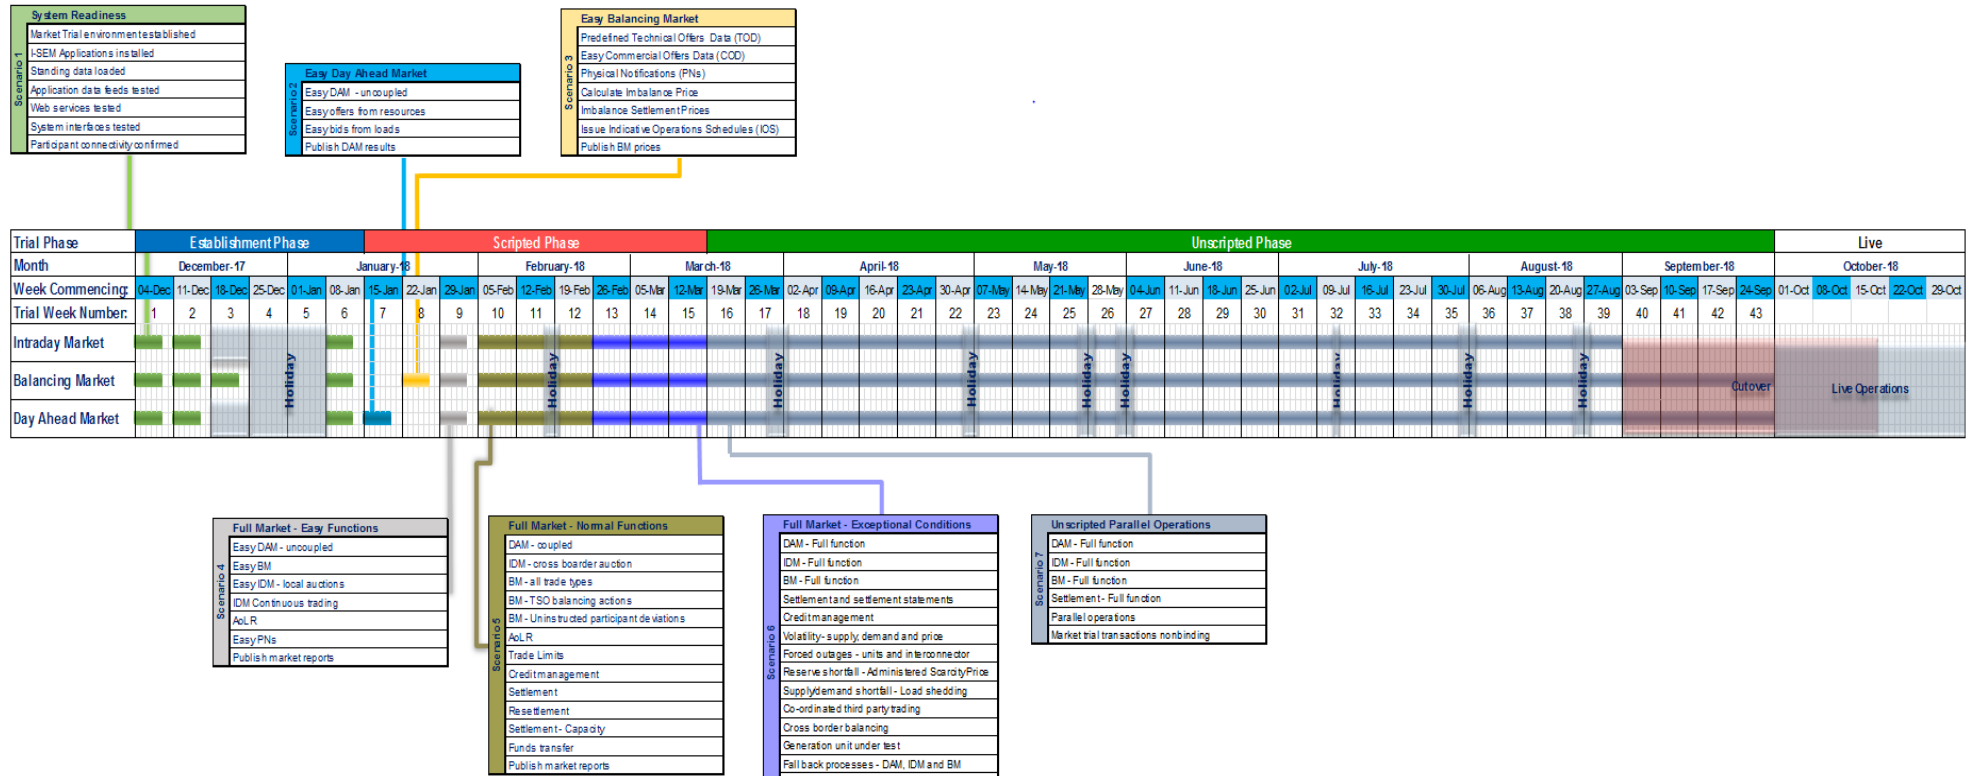

**Market Trial – 7 Day Operations**

**Note:** During Scenario 7 markets will operate 7 days a week.

**SEMOpX will run all Ex-Ante auctions on Saturday and Sunday based on participant submissions.**

## Day 5 – Friday 3rd August 2018 – Execution of Full Market

The planned activities for Friday 3rd August are for all applicable participants to submit Commercial Offer Data into the Coupled Day Ahead Auction for the following trading day, the Balancing Market for the current and subsequent Trading Day for which the Day Ahead Auction has been completed and additionally into the Coupled Intraday Auction IDA1 and the Uncoupled Intraday Auction (IDA3). All Commercial Offer data into the DAM must be submitted ahead of the DAM order book closure whilst submissions to the BM can happen throughout the current trading day.

NB: It is essential for the Balancing Market to operate correctly over the weekend that all required participants submit Physical Notifications (PN's) for the two trading days (Saturday & Sunday). These need to be submitted by 13:30 each day and can be submitted in advance. Can all participants responsible for the submission of PN's please ensure that these are entered for the full weekend period?

Our vendors at SEMOpx will be running all auctions on Saturday and Sunday so participants will need to ensure that their commercial offer data has been submitted to ALL of the required auctions either today or as per the following run sheets for weekend operations.
